

Goal-Setting Framework: One-Two-Twelve

Week 1 -- Your 12-Week Target | The Roadman Method

The One-Two-Twelve framework gives you one emotional target, two trackable goals, and twelve weeks to close the gap.

Your Primary Goal

My primary 12-week goal (the emotional driver)

Your Two Supporting Goals

Supporting goal 1 (performance-related)

How I will measure it

Supporting goal 2 (process or body-composition)

How I will measure it

Your Twelve-Week Number

The number (FTP, W/kg, waist, climbing time)

Week 1 baseline value

Week 12 target value

Sanity Check

- ☐ Is this achievable in 12 weeks with my real hours?
- ☐ Does it depend only on me (not race results)?
- ☐ Is it measurable, not vague?
- ☐ Am I willing to be honest about the result in Week 12?
