

Training Audit Worksheet

Week 1 -- Intensity Distribution | The Roadman Method

"Pro cyclists spend about 80% of their time riding at a pace so slow that recreational riders would be able to ride with them."

-- Anthony Walsh, referencing Professor Seiler's research -- Roadman Cycling Podcast

Step 1: Categorise Every Ride

Zone	Description	How It Feels
GREEN (Z1-2)	Easy, conversational, HR flat	Could talk in full sentences. Appetite at the end.
YELLOW (Z3-4)	Moderate sustained work, tempo	Breathing harder, short bursts of speech only.
RED (Z5+)	Structured high-intensity intervals	Cannot speak. Structured work with structured rest.

Step 2: Calculate Your Distribution

Week	Total Mins	Green Mins	Yellow Mins	Red Mins	Green %	Yellow %	Red %
Week 1							
Week 2							
Week 3							
Week 4							
4-WEEK AVG							

Step 3: The Diagnosis

	Your Average	Polarised Target	Gap
Green %		75-80%	
Yellow %		5-10%	
Red %		15-20%	

If your yellow zone is bigger than your green zone, you do not need more training. You need different training.
