

Weekly Training Architecture -- 10 Hours

Week 2 -- Polarised Template | The Roadman Method

This template is built for 10 available hours per week, following the polarised model from Professor Seiler's research.

"I'm going to begin with frequency. All I care about is you get out the door a certain number of times a week. Six weeks later, now let's stretch one of those workouts. And after 12 weeks, now I'm going to introduce that magic buzzword intervals and intensity."

-- Professor Stephen Seiler -- Roadman Cycling Podcast

Your Weekly Template

Day	Session	Duration	Zone	Key Instruction
Monday	Rest or recovery	0-30 min	--	Off the bike or spin under 55% FTP
Tuesday	Zone 2 steady	1:00	GREEN	HR ceiling alarm set. Conversational.
Wednesday	S&C; (from Wk 4) or rest	30 min	--	Foundation circuit or full rest
Thursday	Quality session	1:30	RED	Structured intervals, structured rest
Friday	Rest or S&C;	0-30 min	--	Second S&C; session or full rest
Saturday	Long Zone 2 ride	4:00-5:00	GREEN	The anchor. Flat HR after warm-up.
Sunday	Zone 2 or coffee ride	1:00	GREEN	Easy spin, social, no data pressure

The Rules

Rule 1: Lock the long ride first. This is the anchor of the week.

Rule 2: Easy means easy. Set a heart rate ceiling alarm. Most riders ride 50% too hard on easy days.

Rule 3: One quality session per week to start. We build to two in later modules.

Rule 4: Protect the total. If life compresses the week, cut the short Z2 rides, never the long ride.
