

In-Ride Nutrition Calculator

Week 3 -- Carbs Per Hour | The Roadman Method

In-ride fuelling targets by session type, based on protocols discussed with World Tour nutritionists on the podcast.

Session Type	Duration	Carbs/Hour	Example Sources
Easy Z2 (<90 min)	<90 min	30-40g	1 bottle mix + banana
Long Z2 Ride	2-4+ hrs	60-80g	2 bottles mix + bars/gels
Quality Intervals	60-90 min	60-80g	Bottle mix + gel before efforts
Race / Sportive	2+ hrs	80-120g	Mix + gels + real food
Recovery Spin	<60 min	0-20g	Water or light mix

Your Calculator

Long ride duration (hours)

Target carbs/hour

Total carbs needed = duration x target

Source	Carbs per unit	Units needed	Total
Bottle mix (per 500ml)			
Energy gel			
Energy bar			
Banana	~25g
