

The Roadman Method

Video Editor Brief

Episode URLs, Timestamps & Clip Requirements by Module

Prepared for the video editor producing companion videos for the 12-module Roadman Method cycling course. Each module section lists existing YouTube episodes containing relevant clips, with timestamps for key chapters, plus a summary of new content still to be filmed.

Date: 11 May 2026 | Contact: anthony@roadmancycling.com

MODULE 1 | WHERE YOU ACTUALLY ARE

Week 1

EXISTING EPISODES FOR CLIPPING

1. 80/20 Training to Ride Faster | Dr Stephen Seiler | Guest: Dr Stephen Seiler | Duration: 1:09:32

<https://www.youtube.com/watch?v=j443DjmheHw>

Key Timestamps:

09:00 — How Seiler arrived at the 80/20 distribution

25:00 — The grey-zone trap most amateurs fall into

35:00 — A practical week structure for amateurs

"The single biggest mistake amateurs make is riding their easy days too hard. Pulling Z2 genuinely easy is what makes the hard sessions productive."

2. Roglic's Coach Builds A Training Plan For Amateur Riders | Dan Lorang | Guest: Dan Lorang | Duration: 49:22

<https://www.youtube.com/watch?v=HQBODPQmOb0>

Key Timestamps:

03:00 — How Lorang assesses a new amateur athlete

17:00 — Heart rate vs power for the time-crunched cyclist

23:00 — Load management: when to push, when to pull

"Lorang's first move with any new athlete is to find the smallest sustainable week and build on it. Consistency is the multiplier; intensity is the noise."

3. 13 Years Of Coaching Pros: What Amateurs Don't Know | Guest: Dan Lorang | Duration: 47:26

<https://www.youtube.com/watch?v=Qbub4VwLHW4>

Key Timestamps:

00:00 — The real gap between pros and amateurs: it's not FTP

36:30 — Why Lorang still uses power + HR + RPE rather than respiratory metrics

41:00 — Torque work, glute activation and amateur weak points

"Plan the season backwards from your A races, then match the taper to your athlete profile."

4. Secret To Cycling Fast At A Low Heart Rate | Prof Seiler | Guest: Prof Seiler | Duration: 51:31

<https://www.youtube.com/watch?v=Z8GqgZBVNjw>

Key Timestamps:

03:30 — Why heart rate decouples from power

09:00 — Mitochondrial density and what it actually does

31:00 — Where 80/20 fits the low-HR question

"Holding more power at a lower heart rate is the visible signature of aerobic adaptation."

STILL NEEDED: NEW CONTENT TO FILM

- Anthony walkthrough: how to run a baseline FTP test (ramp test + 20-min protocol)
- Screen recording: setting up training zones in TrainingPeaks/Intervals.icu from FTP result
- Anthony to-camera: "Where I was when I started" personal story segment
- PDF walkthrough: the Module 1 self-assessment worksheet

MODULE 2 | TRAINING ARCHITECTURE

Week 2

EXISTING EPISODES FOR CLIPPING

1. 80/20 Training to Ride Faster | Dr Stephen Seiler | Guest: Dr Stephen Seiler | Duration: 1:09:32

<https://www.youtube.com/watch?v=j443DjmheHw>

Key Timestamps:

09:00 — How Seiler arrived at the 80/20 distribution

17:00 — What 'easy' actually feels like

25:00 — The grey-zone trap most amateurs fall into

35:00 — A practical week structure for amateurs

55:00 — Recovery, monotony and avoiding burnout

"The 80/20 split is the pattern Seiler measured across elite endurance athletes. It is a description of what works, not a coaching opinion."

2. Train Slower, Ride Faster: The 80/20 Cycling Training Guide | Duration: 21:33

<https://www.youtube.com/watch?v=bWToazisdDM>

"The rule for an endurance ride: tired but not exhausted. If you can't repeat the ride tomorrow, you went too hard today."

3. Secret To Zone 2 Training - Dose, Frequency & Duration | Duration: 35:34

<https://www.youtube.com/watch?v=qt6tF-GwFEw>

"For time-crunched riders training six to eight hours, a pyramidal mix can substitute for strict 80/20 without abandoning the principle."

4. How To Combine Zone 2 with High Intensity Training | Duration: 36:06

<https://www.youtube.com/watch?v=fWDAA2AORMo>

"A working 4-day structure for ~8 hours/week: one 3-hour zone 2 ride, one 2-hour zone 2 ride, two shorter high-intensity sessions."

5. Brownlee - 5 Endurance Lessons I Wish I Knew Earlier | Guest: Alistair Brownlee | Duration: 54:25

https://www.youtube.com/watch?v=gZEI_NCr5_I

"Volume at low intensity is what builds the base that lets you absorb harder work later."

STILL NEEDED: NEW CONTENT TO FILM

- Anthony whiteboard: building a sample training week (visual breakdown)
- Screen recording: how to set up a polarised plan in TrainingPeaks
- Anthony to-camera: explaining the grey-zone trap with real power data examples

MODULE 3 | FUELLING THE ENGINE

Week 3

EXISTING EPISODES FOR CLIPPING

1. World Tour Nutritionist - "We Got Weight Loss Wrong" | Guest: Dr David Dunne | Duration: 1:57:35

<https://www.youtube.com/watch?v=6aFua2nfXZ8>

Key Timestamps:

06:00 — Why World Tour teams stopped chasing race weight

38:00 — Carbohydrate periodisation around hard work

52:00 — Protein timing for endurance athletes

1:08:00 — What pros eat on a hard training day

1:40:00 — Practical changes for amateurs starting tomorrow

"Pro teams treat fuelling first and weight as a downstream consequence of training and good food choices, not the primary lever."

2. How Cyclists Can Get Lean & Stay Lean Forever | Alex Larson | Guest: Alex Larson | Duration: 44:45

<https://www.youtube.com/watch?v=VUdfypeS-tw>

Key Timestamps:

04:00 — The recomposition vs weight-loss distinction

17:00 — The 'don't diet on the bike' rule

29:00 — Periodising carbs to training load, not the calendar

"Don't diet on the bike. Skipping gels to 'save calories' compromises performance, blunts recovery and triggers compensatory eating."

3. Forget What You Eat, It's When You Eat That Changes Everything | Guest: Dr Berry | Duration: 42:49

<https://www.youtube.com/watch?v=sjImfiRhZ58>

"Eat fibre, fat or protein BEFORE carbohydrates. Same meal, lower glucose peak."

4. Lost 7kg Eating More: Cycling Nutrition That Works | Duration: 19:36

<https://www.youtube.com/watch?v=ew43jjG6Gv0>

"Match carbohydrate intake to the day. ~2g per kg bodyweight before a hard session and 90g per hour during it."

5. Ben Healy's 140g/hr Fueling Strategy | Duration: 16:12

<https://www.youtube.com/watch?v=NYGm2GXUo84>

"The gut is trainable like the legs. Train it deliberately by progressively raising on-bike carb intake."

STILL NEEDED: NEW CONTENT TO FILM

- Anthony kitchen demo: meal prep for a hard training day vs rest day
- Screen recording: using MyFitnessPal/Cronometer to track carb periodisation
- PDF walkthrough: the Module 3 fuelling calculator worksheet
- B-roll: on-bike fuelling setup (bottles, gels, bar bag)

MODULE 4 | STRENGTH THAT TRANSFERS

Week 4

EXISTING EPISODES FOR CLIPPING

1. The Best Exercises For Cyclists (Strength Training) | Guest: Derek Teel | Duration: 34:19

<https://www.youtube.com/watch?v=fE1HnDXdgac>

Key Timestamps:

03:30 — Strength has zones too: endurance, hypertrophy, strength, power

08:30 — 16-20 reps as the strength equivalent of an aerobic base

14:00 — Reps in reserve: how to pick weight without max-testing

19:30 — Two sessions a week and why one is forever-soreness territory

24:30 — How to slot lifting around the cycling week

"Treat the weight room like the bike: periodise across rep zones rather than defaulting to one protocol."

2. Strength Training For Cycling Simplified | Derek Teel | Guest: Derek Teel | Duration: 55:20

<https://www.youtube.com/watch?v=HaVt4BF8yco>

"Strength training improves nearly every dimension of cycling performance EXCEPT VO2 max."

3. I Tried Keegan Swenson's Insane Strength Routine | Duration: 40:11

https://www.youtube.com/watch?v=1B1r_B6KO0M

"Leg strength is almost never the limiting factor. Weak core and upper body prevent riders from accessing the leg power they already have."

4. Core Strength For Cyclists: Fix Lower Back Pain | Duration: 4:31

<https://www.youtube.com/watch?v=aU5oF6hgY-8>

"Anthony's three-exercise routine targets the actual cause of lower back pain on long rides."

5. Heavy Strength Training for Cyclists Over 40 | Duration: 16:00

<https://www.youtube.com/watch?v=KyMysrsaeAg>

"Heavy strength training significantly improved cycling efficiency, anaerobic power, and time-trial performance. No negative effect on VO2 max."

STILL NEEDED: NEW CONTENT TO FILM

- Exercise demo video: full S&C; routine with proper form (squat, deadlift, split squat, hip thrust)
- Anthony gym walkthrough: how to structure a 30-minute cyclist strength session
- PDF walkthrough: the Module 4 strength programme worksheet

MODULE 5 | RECOVERY MULTIPLIER

Week 5

EXISTING EPISODES FOR CLIPPING

1. Pogacar's Post-Race Recovery Routine | Duration: 13:39

<https://www.youtube.com/watch?v=uUOHqSQP-ds>

"The 60 minutes after a hard race is when the actual recovery begins. Most amateurs sit on the curb and call it a day."

2. Are Infrared Sauna's good for athletes? | Duration: 7:26

<https://www.youtube.com/watch?v=UX-CHpr5JiQ>

"Anthony's post-travel protocol: ~1 hour at 55-57C to flush inflammation."

3. Should you workout when you're sick? | Duration: 7:21

<https://www.youtube.com/watch?v=8NrCytgcFeE>

"Use the neck check. Symptoms above the neck usually permit easy training; anything below means rest."

4. Pro Cyclist on Training Fatigue & Racing | Guest: Darren Raferty | Duration: 1:27:25

<https://www.youtube.com/watch?v=Ja79vCbdi3g>

"The lifestyle is automation, not willpower. Decisions removed = energy preserved."

5. 80/20 Training to Ride Faster | Dr Stephen Seiler | Guest: Dr Stephen Seiler | Duration: 1:09:32

<https://www.youtube.com/watch?v=j443DjmheHw>

Key Timestamps:

55:00 — Recovery, monotony and avoiding burnout

1:03:00 — The mental side of polarised training

"Long, slow distance is the irreplaceable foundation. High-intensity work layered on a thin aerobic base produces short-lived gains."

STILL NEEDED: NEW CONTENT TO FILM

- Anthony to-camera: personal recovery protocol (sleep routine, HRV tracking, rest days)
- Screen recording: setting up HRV tracking in Whoop/Oura/Garmin
- PDF walkthrough: the Module 5 recovery audit checklist
- B-roll: cooldown routine, foam rolling, stretching sequence

MODULE 6 | LE METIER

Week 6

EXISTING EPISODES FOR CLIPPING

1. Lachlan Morton: Why He Quit WorldTour | Guest: Lachlan Morton | Duration: 1:08:13

<https://www.youtube.com/watch?v=HBx18rxMpkk>

Key Timestamps:

14:00 — The breaking point

32:00 — Training without power or heart rate

42:00 — The Alt Tour and ultra-distance racing

1:01:00 — Keeping cycling weird

"Joy is a training input, not a reward. Riders who like the work compound for decades."

2. Secrets Of The Worlds Fastest Hill Climber - Jack Burke | Guest: Jack Burke | Duration: 39:43

<https://www.youtube.com/watch?v=QMivxqrXnH8>

"Burke broke the Strava KOMs on Stelvio, Alpe d'Huez and Mortirolo. Largely unplanned, born from a Zwift Academy block."

3. 5 Fixable Climbing Mistakes | Duration: 26:48

<https://www.youtube.com/watch?v=Zsb8Ro3zWCU>

"Climbing has two halves: physics (power/weight) and execution (pacing, cadence, fuel, cooling). Most amateurs lose to execution mistakes."

4. These Mistakes Are Ruining Your Climbing (Easy Fix) | Duration: 33:41

<https://www.youtube.com/watch?v=COcauC61fbo>

"Pace climbs linearly. The most common error is going too hard too early."

5. Badlands 800km Fueling & Pacing Strategy | Guest: Chris Melman | Duration: 57:04

<https://www.youtube.com/watch?v=aPeZbtVzQCQ>

"The race breaks people on smarts and suffering management, not raw fitness."

STILL NEEDED: NEW CONTENT TO FILM

- Anthony ride film: pacing a real climb with power data overlay
- Anthony to-camera: "Le Metier" concept explained (the craft of cycling)
- PDF walkthrough: the Module 6 climbing pacing calculator

MODULE 7 | PERIODISATION

Week 7

EXISTING EPISODES FOR CLIPPING

1. Joe Friel's Cycling Training Plan Structure | Guest: Joe Friel | Duration: 52:54

https://www.youtube.com/watch?v=ov9qv73_IH4

Key Timestamps:

- 04:30** — A, B and C races and why amateurs over-design the calendar
- 11:00** — Base, build and peak: the three phases that survive every fad
- 18:30** — You can't have too much base
- 25:30** — Distributing 10 hours a week across the year
- 32:00** — The 9-day cycle for masters athletes
- 39:00** — Durability: the new trainable quality

"Pick the A-race first, then build the calendar backwards from it. Most amateur seasons fail because they are scheduled forwards from January."

2. Roglic's Coach Builds A Training Plan For Amateur Riders | Guest: Dan Lorang | Duration: 49:22

<https://www.youtube.com/watch?v=HQBODPQmOb0>

Key Timestamps:

- 09:30** — Building a sustainable week around real life
- 23:00** — Load management: when to push, when to pull
- 43:00** — One change Lorang would make for every busy rider

"For busy cyclists, total weekly load matters more than any single key session."

3. Boost Your Cycling Fitness in 30 Days: Complete Training Plan | Duration: 16:37

https://www.youtube.com/watch?v=_JhU47AxxBw

"Reverse periodisation: sprint power first, then VO2, threshold, event-specific. Each phase builds on the previous adaptation."

4. 5 Crucial Winter Training Tips I Wish I Knew Sooner | Duration: 37:39

<https://www.youtube.com/watch?v=mOYipO4yvOk>

"Take 2-4 weeks fully off the bike before structured winter training. Marker: you should be yearning to ride again."

5. How This Simple Training Plan Won Me Unbound (2024) | Guest: Rosa Kloser | Duration: 35:44

https://www.youtube.com/watch?v=Ft_JyF-ScXM

Key Timestamps:

- 11:00** — The simple training plan, week-to-week
- 17:00** — Long-day endurance and gravel-specific volume

"Her plan was simple: high volume, sensible intensity distribution, long endurance days, and the discipline to repeat them."

STILL NEEDED: NEW CONTENT TO FILM

- Anthony whiteboard: building an annual training plan (base/build/peak visual)
- Screen recording: setting up mesocycles in TrainingPeaks
- PDF walkthrough: the Module 7 season planner worksheet
- Anthony to-camera: how to identify your A, B, and C races

MODULE 8 | RACE WEIGHT

Week 8

EXISTING EPISODES FOR CLIPPING

1. How Cyclists Can Get Lean & Stay Lean Forever | Alex Larson | Guest: Alex Larson | Duration: 44:45

<https://www.youtube.com/watch?v=VUdfypeS-tw>

Key Timestamps:

- 04:00 — The recomposition vs weight-loss distinction
- 10:00 — 1.5-2g protein per kg, and why masters need the upper end
- 23:00 — Front-loading calories and the 8pm grazing problem
- 29:00 — Periodising carbs to training load

"The goal isn't weight loss - it's recomposition. Lower body fat while protecting muscle and power."

2. World Tour Nutritionist - "We Got Weight Loss Wrong" | Guest: Dr David Dunne | Duration: 1:57:35

<https://www.youtube.com/watch?v=6aFua2nfXZ8>

Key Timestamps:

- 06:00 — Why World Tour teams stopped chasing race weight
- 16:00 — Body composition vs total mass
- 26:00 — Energy availability: the under-diagnosed problem
- 1:24:00 — Race weight in the real world: three rider archetypes

"The 'lighter is faster' framing has cost amateurs more power than it has saved on climbs."

3. How Pro Cyclists Stay Lean | Guest: Dr Tim Podlogar | Duration: 47:12

<https://www.youtube.com/watch?v=V8nK13fONLc>

Key Timestamps:

- 04:30 — How Tudor actually measures leanness: 7-site skinfolds, not DEXA
- 17:30 — The deficit power-drop is glycogen access, not real power
- 24:00 — Fuel for the work required, applied asymmetrically
- 36:00 — When gaining muscle beats losing fat

"When power drops on a diet, it's not your real power dropping. It's your access to it."

4. Eating for Race Weight: Cycling Nutrition with a World Tour Coach | Guest: Dr. Sam Impey | Duration: 31:50

<https://www.youtube.com/watch?v=TnVUNr1EFaU>

"Race weight isn't a number. It's where power, training tolerance and durability converge."

5. Omerta Busted: How Pro Cyclists Lose Weight FAST | Guest: Hannah Grant | Duration: 42:04

<https://www.youtube.com/watch?v=fAvIMy4UQu4>

Key Timestamps:

- 17:30 — The 5-10 kg overweight amateur and the alcohol question
- 24:00 — Why fuelling on the bike matters more than fasting off it
- 30:00 — Pro carb intake at 60-120 g/hr and what amateurs should copy

"Hannah Grant's first question for amateurs: what's your alcohol intake? It's the first thing that needs to go."

STILL NEEDED: NEW CONTENT TO FILM

- Anthony to-camera: personal weight loss story (lost 9kg eating more)
- PDF walkthrough: the Module 8 body composition tracker
- Screen recording: how to track body composition metrics properly

MODULE 9 | POWER WHERE IT COUNTS

Week 9

EXISTING EPISODES FOR CLIPPING

1. Low Cadence Training: 8.7% VO2max Gain | Duration: 19:40

<https://www.youtube.com/watch?v=tcar3G2v73I>

"Low-cadence interval training at 50-70 RPM produced 8.7% VO2max gains over 8 weeks vs 4.6% in freely-chosen cadence group."

2. How Team Bora Build Endurance: John Wakefield | Guest: John Wakefield | Duration: 54:12

<https://www.youtube.com/watch?v=6eX16aGkk44>

Key Timestamps:

31:00 — Torque, low-cadence work and the fatigue cadence drop

37:30 — Why ultra riders still need VO2 max work

44:00 — Strength training, sleep and recovery monitoring

"Late-stage ultra-cyclists run on Newton-meters of torque, not watts. As cadence drops, the workload shifts to muscular strength."

3. 13 Years Of Coaching Pros: What Amateurs Don't Know | Guest: Dan Lorang | Duration: 47:26

<https://www.youtube.com/watch?v=Qbub4VwLHW4>

Key Timestamps:

31:00 — Heat training protocol: 1 hour, 5x/week, 3-4 weeks

41:00 — Torque work, glute activation and amateur weak points

"Torque work and glute activation are the amateur weak points that Lorang consistently sees."

4. Cory Williams on Sprint Power & Cycling Training | Guest: Cory Williams | Duration: 39:49

<https://www.youtube.com/watch?v=PxsUTmtVJIY>

"Cory Williams has hit 1,640 watts in a sprint. The gap between peak power and race-winning power is the actual coaching question."

5. Heat Training for Cyclists: +30 Watts FTP | Duration: 24:51

<https://www.youtube.com/watch?v=VRTz0LC3aa0>

"Structured heat training can lift FTP by 20-30W, raise haemoglobin mass by 3-4% and increase VO2 max by roughly 6%."

STILL NEEDED: NEW CONTENT TO FILM

- Anthony on-bike demo: low cadence / high torque interval session with power data overlay
- Exercise demo: torque-specific drills and warm-up routine
- PDF walkthrough: the Module 9 power development programme
- Anthony to-camera: VO2max training explained simply

MODULE 10 | THE BRAIN IS THE LIMITER

Week 10

EXISTING EPISODES FOR CLIPPING

1. How To Increase Your Motivation | Erin Ayala | Guest: Erin Ayala | Duration: 48:19

<https://www.youtube.com/watch?v=F-1cYY958u0>

"Self-efficacy beats general confidence. Build it from prior reps, watching similar teammates succeed, and reviewing concrete data."

2. Beating Negative Thoughts: Why 99% Fail | Dr Gervais | Guest: Dr Michael Gervais | Duration: 37:57

https://www.youtube.com/watch?v=FYaWsKMX_EI

"It's not the negative opinion that derails you. It's the fear of it. The exhaustive scanning of cues is what consumes mental bandwidth."

3. Override Descending Fear | Duration: 22:00

https://www.youtube.com/watch?v=368mV4V_74c

"The amygdala fires before your conscious mind votes. Vincenzo Nibali at 70kph isn't braver, he has more stored patterns."

4. Lachlan Morton: Why He Quit WorldTour | Guest: Lachlan Morton | Duration: 1:08:13

<https://www.youtube.com/watch?v=HBx18rxMpkk>

Key Timestamps:

14:00 — The breaking point

22:00 — Walking away and what came next

"Performance was eating the part of cycling that made him want to ride."

STILL NEEDED: NEW CONTENT TO FILM

- Anthony to-camera: pre-race mental preparation routine
- Anthony personal story: the Stelos meltdown and what it taught him about mental limits
- PDF walkthrough: the Module 10 mental performance toolkit
- Guided visualisation audio segment (could be voiceover with ride footage)

MODULE 11 | YOUR SYSTEM INTEGRATED

Week 11

EXISTING EPISODES FOR CLIPPING

1. 5 Mistakes Self-Coached Cyclists Make | Duration: 30:33

<https://www.youtube.com/watch?v=xXJpHjrtI8M>

"All coaching tools accept your framing of the problem and answer the wrong question. FTP is a fitness marker, not a race winner."

2. 5 Cycling Training Mistakes Slowing You Down | Duration: 30:38

<https://www.youtube.com/watch?v=mEWKdE50lg0>

"On-bike fuelling target: 60-120g of carbohydrate per hour for endurance rides. Strength training twice a week is non-negotiable."

3. 5 Common Training Mistakes Even Pro's Make | Duration: 36:11

<https://www.youtube.com/watch?v=4Te7YILRLI>

"Success is dictated by your worst weeks, not your best. The goal is adaptation, not session completion."

4. 13 Years Of Coaching Pros: What Amateurs Don't Know | Guest: Dan Lorang | Duration: 47:26

<https://www.youtube.com/watch?v=Qbub4VwLHW4>

Key Timestamps:

00:00 — The real gap between pros and amateurs

18:30 — Life stress, partners and bosses inside the training plan

45:30 — The year plan as the most underrated coaching tool

"Periodise life stress alongside training. Share the year plan with partner, family and boss."

5. Roglic's Coach Builds A Training Plan For Amateur Riders | Guest: Dan Lorang | Duration: 49:22

<https://www.youtube.com/watch?v=HQBODPQmOb0>

Key Timestamps:

30:00 — What Roglic does that amateurs can copy

37:00 — The recovery side most amateurs ignore

"Heart rate is still the most useful daily signal for amateurs because it integrates sleep, work stress and life load."

STILL NEEDED: NEW CONTENT TO FILM

- Anthony to-camera: "Building Your System" - integrating all modules into a personal plan
- Screen recording: weekly review process in TrainingPeaks/Intervals.icu
- PDF walkthrough: the Module 11 self-coaching checklist
- Anthony personal story: lessons from coaching himself through a full season

MODULE 12 | NOT DONE YET

Week 12

EXISTING EPISODES FOR CLIPPING

1. The Science Of Getting Faster After 40 | Dr Andy Galpin | Guest: Dr Andy Galpin | Duration: 1:14:00

<https://www.youtube.com/watch?v=Fi7TY8M3b1Y>

Key Timestamps:

- 04:30 — What actually changes in muscle after 40
- 11:15 — Type I vs type II fibres: the fight masters cyclists are losing
- 27:05 — Why endurance training alone is not enough
- 34:20 — Velocity-based training and what "fast enough" means
- 49:45 — Protein dosing, sleep, and the masters recovery picture
- 1:05:00 — One change every cyclist over 40 should make this week

"Power declines faster than strength, and strength declines faster than muscle mass. The thing that fades first after 40 is the nervous system."

2. Get Faster After 40: Masters Cycling Training | Duration: 17:13

<https://www.youtube.com/watch?v=j1E1fzL410A>

"VO2 max decline after 40 ranges from 5% to 46% per decade - depending mostly on training choices."

3. The Training Secret To Going FASTER After 40 | Joe Friel | Guest: Joe Friel | Duration: 40:25

<https://www.youtube.com/watch?v=9OdwwV7oZy4>

Key Timestamps:

- 04:00 — VO2max decline and how much you can prevent
- 10:00 — Why strength training is non-negotiable
- 22:00 — Recovery: the actual ceiling
- 33:00 — Mindset: it is not over

"Strength training is non-negotiable past 40. It preserves the muscle that holds power output up across decades."

4. 10 years of Cycling Knowledge In Under 5 Minutes | Duration: 34:30

https://www.youtube.com/watch?v=SUhR_kKVXcs

"Training doesn't make you faster - recovery does. Sessions create the possibility of adaptation; adaptation happens at rest."

5. Lachlan Morton: Why He Quit WorldTour | Guest: Lachlan Morton | Duration: 1:08:13

<https://www.youtube.com/watch?v=HBx18rxMpkk>

Key Timestamps:

- 42:00 — The Alt Tour and ultra-distance racing
- 52:00 — What gravel is becoming
- 1:01:00 — Keeping cycling weird

"The amateur lesson is that the metric is a tool, not the master, and most riders are managed by it."

STILL NEEDED: NEW CONTENT TO FILM

- Anthony to-camera: "Not Done Yet" manifesto and community invitation
- Compilation montage: community member stories and transformations
- PDF walkthrough: the Module 12 long-term development plan
- Anthony personal reflection: what cycling has meant over a decade+
- Skool community onboarding walkthrough
